

## Final Prompt Used

You are the chief marker of grade 8 English essays with 20 years of experience, and you always provide accurate and unbiased scoring based on the provided rubrics.

Your task is to first evaluate the content and language in the given essays using the rubrics before providing a final score.

The exam prompt is as follows:

More and more people use computers, but not everyone agrees that this benefits society. Those who support advances in technology believe that computers have a positive effect on people. They teach hand-eye coordination, give people the ability to learn about faraway places and people, and even allow people to talk online with other people. Others have different ideas. Some experts are concerned that people are spending too much time on their computers and less time exercising, enjoying nature, and interacting with family and friends.

Write a letter to your local newspaper in which you state your opinion on the effects computers have on people. Persuade the readers to agree with you.

The following are the rubric guidelines that you will use to score each essay:

Score Point 1: An undeveloped response that may take a position but offers no more than very minimal support.

Typical elements:

Contains few or vague details.

Is awkward and fragmented.

May be difficult to read and understand.

May show no awareness of audience.

Score Point 2: An under-developed response that may or may not take a position.

Typical elements:

Contains only general reasons with unelaborated and/or list-like details.

Shows little or no evidence of organization.

May be awkward and confused or simplistic.

May show little awareness of audience.

Score Point 3: A minimally-developed response that may take a position, but with inadequate support and details.

Typical elements:

Has reasons with minimal elaboration and more general than specific details.

Shows some organization.

May be awkward in parts with few transitions.

Shows some awareness of audience.

Score Point 4: A somewhat-developed response that takes a position and provides adequate support.

Typical elements:

Has adequately elaborated reasons with a mix of general and specific details.

Shows satisfactory organization.

May be somewhat fluent with some transitional language.

Shows adequate awareness of audience.

Score Point 5: A developed response that takes a clear position and provides reasonably persuasive support.

Typical elements:

Has moderately well elaborated reasons with mostly specific details.

Exhibits generally strong organization.

May be moderately fluent with transitional language throughout.

May show a consistent awareness of audience.

Score Point 6: A well-developed response that takes a clear and thoughtful position and provides persuasive support.

Typical elements:

Has fully elaborated reasons with specific details.

Exhibits strong organization.

Is fluent and uses sophisticated transitional language.

May show a heightened awareness of audience.

Here is a scoring example:

essay: ""

Dear newspaper, I think that using your computer too much is bad. Some people spend way too much time on the internet. Many people are too focused on the internet and they lack on their normal activities. Also, the computer is bad for people because they will be on the internet all night and get no sleep. This leaves them exhausted for the day ahead. Alot of people spend too much time on the internet. Since they are always on the internet, they don't spend alot of time with their families. This causes the internet addicted person to lose relationships with their family and friends. Not exercizing is a result of this addiction also. For example, my stepbrother is always on the internet now. He doesn't talk to anyone because he is so preoccupied with his game. Another problem people encounter with the internet is being too focused. When you are too focused on the internet, you forget there is a whole world out there that needs your help, most people won't do their choires, or make a meal for their family. These people also have no time for their outdoor activities they used to enjoy. Internet addicts usually don't get any sleep. They have no time to study at night because they spend all their extra time on the internet. During the day, they will be very tired in school or work and the internet will be the one to blame. Last month my mom made a facebook. She is constantly on it. When she is on she ignores everything around her. My mom goes to school and she tells me how she never has time to study because she always on the internet. She also stopped reading the bible in her spare time to go on the internet. The internet is a bad thing to get hooked on. You lose relationships with your friends and family because you never get off the computer. People usually don't exercize or do thier chores. This is not a very good addiction to get into.

!!!!

Response:

essay\_id: 288

score: 4

Feedback: The essay takes a clear position against excessive computer use and provides multiple reasons with some elaboration and relevant examples, showing adequate organization. However, ideas are somewhat repetitive and language occasionally lacks fluency. Overall, it shows a satisfactory awareness of the audience.

In my opinion, the increasing use of computers is not benefiting society. Initially, ones safety while using a computer is at risk. To begin, when someone is talking to another on a computer, they (BAMNTH) never know who is at the other end of it. For example, (BAMNTH) was playing a game on the computer and a person began talking to her, it could be a predator. She will never know unless they meet us somewhere. At this point, it maybe too late. Moreover, studies show that (BPERCENT) of people's information is more widely exposed in the last (BNUM1) years due to the new chat websites. Such as myspace and facebook. In these websites, people share their information. With this, their safety is at risk. Finally, people should stop using computers as much as they are now, in order to keep their safety safe. Furthermore, enjoying nature is a must, in our world full of immense landscapes, wide waters, dense forests, and lush valleys. (BAMNTH) you depend on your computer to teach you about the world, you should cease this use. One must actually be outside, experiencing the feel, the smell, and even the taste of nature. A recent study shows that people who actually went to the grand canyon could write a (BNUM1) page essay on what they had learned. The people who didn't go and simply read information off their computer, could not write this much. Finally, society needs to back away from their computers, and stop into. Thirdly, a person's social life could be ruined from the use of computers for many reasons. One reason for this could be that a person spends all their time on their computer instead of spending time with their family and friends. Sure, you can chat with people online, but that's nothing like chatting in person. There is no need to talk to a friend or family member online, when you could do it in person. Finally, (BAMNTH) someone takes an embarrassing picture of you and puts it on their computer, it is there forever. Thus, you can lose friends, whether you're the person in the picture or the addict who put the picture on. With this, you can easily ruin your family/social life by using your computer too often. How would you feel (BAMNTH) it was your fault that someone's safety is at risk? Wouldn't you rather enjoy nature in person instead of which it on your computer and not get the full effect? Couldn't you talk to your friends and family in person rather than ignore them to use your computer? There are numerous ways in which the increasing rate of computer use does not benefit society. I encourage you to agree with me that computers can put one safety at risk decrease their education of nature and ruin their social life.</div><div>Model essay_id: 7 score: 5 Feedback: The essay takes a clear position against the increasing use of computers and provides reasonably persuasive support with moderately well-elaborated reasons and mostly specific details. The organization is generally strong, and the essay shows a consistent awareness of the audience through its direct address and rhetorical questions. While there are some minor grammatical errors and awkward phrasing, the overall fluency is good, and transitional language is used effectively.</div><div>Start typing a prompt</div></div></div><div>essay_id: 7 score: 5 Feedback: The essay takes a clear position against the increasing use of computers and provides reasonably persuasive support with moderately well-elaborated reasons and mostly specific details. Seconde give detailed resons that will persuade of the local newspaper to agree with yor posttion. This are my three ideas to the news oaser article. To bighn my opinion about the computer effects are wast time. Many people wast time computers like fat people insted by in the computer go and run or exercising. Insted be computer go out ur girlfriend or family or friends to have fun. So be incomputer to long is bad many kids wech bad stuff like for adults. Is good to be in computer but not to long. To start you shod agree with me because my detailed and my reason. My resons are many ains the bad stuff like porn. Many kids weach that it ruins their mainly and the futur. They get addicted to that watching. So people that use computer for good stuff its old for kids for good games of good. This are my detailed and resons for yor with me. To bighn and going to organize my ideas and well and present them clearly. If good to be at the computer but not the long insted go out plat and exerisus. abd you can enjoy life insted be in computer. The bad things many kids weach bad stuff and computer has vely bad stuff. The computer is use for every thing this days. This how organize my ideas. In conclusion this are my ideas for the news paper. Ois I state my opinion on computer effects. I give detailed and resons that will persuade local news paper and to agree with me. Think I organize my ideas as much present them clearly. This are my ideas so could new paper to se computers effects.</div><div>Model essay_id: 14 score: 1 feedback: The essay attempts to take a position against excessive computer use but offers very minimal and undeveloped support. Model

essay\_id: 623  
score: 2

feedback: The essay attempts to take a position on the benefits of computers but offers only general reasons with unelaborated and list-like details. The organization is weak, with an abrupt ending and a lack of clear transitions. The language is simplistic and contains grammatical errors, making it awkward and difficult to follow in parts. There is little awareness of the audience beyond the initial address to the newspaper.

921

essay\_id: 921

score: 4

feedback: The essay takes a clear position in favor of computers and provides adequately elaborated reasons with a mix of general and specific details. It shows satisfactory organization with some transitional language. The essay demonstrates adequate awareness of the audience by attempting to persuade them with various benefits of computers.

1107

essay\_id: 1107

score: 2

feedback: The essay attempts to take a position by stating computers are both "good and bad," but the support is very general and lacks elaboration. The reasons provided are simplistic and list-like, such as "keep you out of trouble and can keep you entertained." The essay also contains awkward phrasing ("can become a computer. Freak and become higher when it comes to computers") and shows little evidence of organization, making it difficult to understand in parts. There is minimal awareness of the audience.
